PROFILE

Fullstack developer trained at the Higher Polytechnic School of Antananarivo, with hands-on experience on high-stakes public-sector applications (public portals, sensitive data). Core stack: Symfony/Laravel on the backend, React/Vue on the frontend, MySQL. Personal projects deployed and documented at rommy.dev.

WORK EXPERIENCE

Web Developer Intern — Directorate General of Budget and Finance (DGBF)

January – March 2026

- Worked with a UI designer and a fullstack developer in a cross-functional team, shipping weekly iterations of the DGBF public portal (dgbf.mg)
- Built REST API endpoints with Laravel 11 and Eloquent ORM for the interactive org chart and budget transparency modules
- Implemented Vue 3/TypeScript interfaces for the portal's public pages
- Secured the admin area with Laravel Sanctum

Web Developer Intern — Ministry of the Interior and Decentralization

January – March 2026

- Designed a backend API with Symfony 7 and API Platform to manage birth certificates
- Built the business interfaces with React and TypeScript (login, dashboard, certificate management)
- Modeled a relational database covering declarants, legal guardians and parents
- Implemented authentication and role-based access control over sensitive data

PROJECTS

TontiTrack — github.com/rommy-dev/tontitrack | Demo: tontitrack-client.onrender.com

- Built a 42-route REST API with Node.js, Express and MongoDB, and a React/Tailwind CSS interface
- Covered the API with 32 automated Jest tests (4 suites)
- Containerized with Docker and deployed on Render

Workspace App — github.com/rommy-dev/workspace-app

- Designed a 33-route REST API in plain PHP 8.3, without a framework (hand-written router and middleware)
- Covered the business logic with 23 PHPUnit integration tests (60 assertions)
- Containerized with Docker Compose (app + MySQL 8)

Personal portfolio — rommy.dev | github.com/rommy-dev/portfolio

- Built with Next.js, TypeScript, Tailwind CSS and Framer Motion, with an MDX-based content system

SKILLS

Backend	PHP, Symfony 7, Laravel 11, API Platform, Doctrine/Eloquent ORM, Node.js, Express
Frontend	React, Vue.js, Next.js, TypeScript, Tailwind CSS
Databases	MySQL, MongoDB
Testing	PHPUnit, Jest
DevOps/Tools	Docker, Git/GitHub, Postman, Render, Vercel

EDUCATION

Master's Year 1 — Applied Computer Science (Software track)

Higher Polytechnic School of Antananarivo (ESPA)

2025 – 2026 (in progress)

Bachelor's Degree — Electronics and Applied Computer Science

Higher Polytechnic School of Antananarivo (ESPA)

2022 – 2025
